

# Project Execution Phase

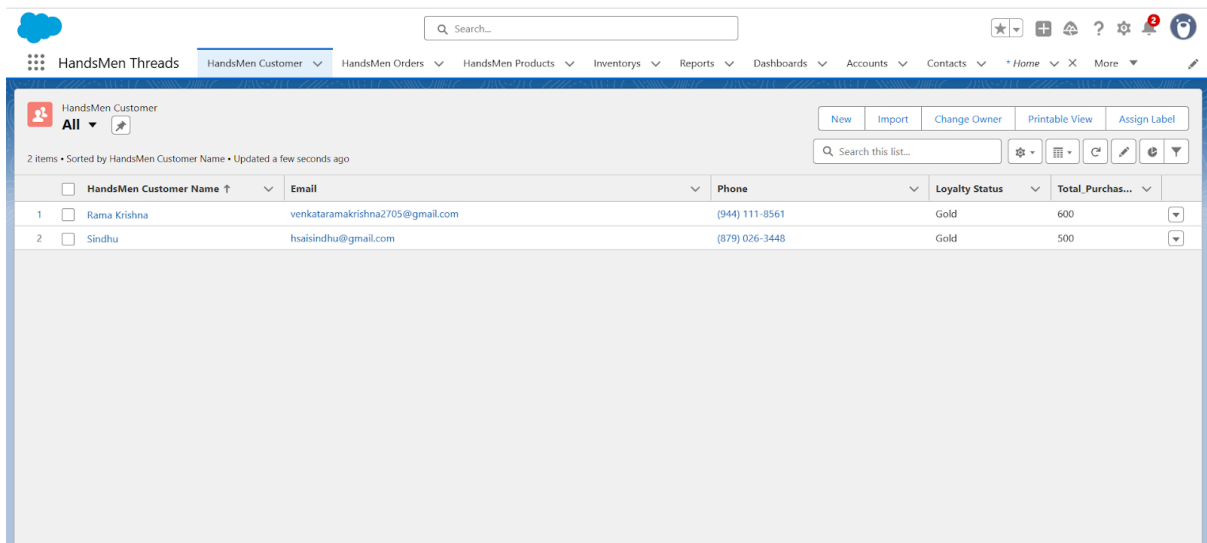

## Datasets

Date	18 July 2025
Name	Motapothu Hima Sai Sindhu
Project Name	HandsMen Threads – Elevating the Art of Sophistication in Men’s Fashion

### Datasets:

In the project execution phase, datasets are the structured sample records that populate custom objects for testing, automation, reporting, and user simulation. These records ensure that workflows, validation rules, Apex triggers, and reports behave as expected.

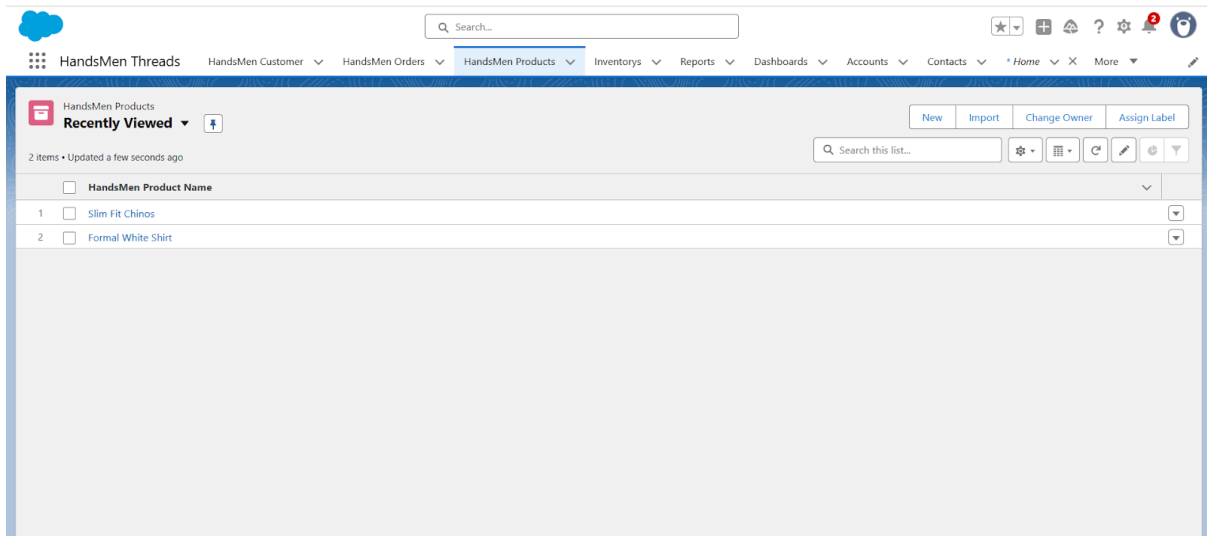

### 1. HandsMen Customer Dataset:

The screenshot shows the Salesforce interface for the 'HandsMen Customer' object. The top navigation bar includes 'HandsMen Threads' and various sub-objects like 'HandsMen Customer', 'HandsMen Orders', 'HandsMen Products', 'Inventories', 'Reports', 'Dashboards', 'Accounts', 'Contacts', and 'Home'. The main content area displays a list of 2 items, sorted by 'HandsMen Customer Name'. The list includes columns for 'HandsMen Customer Name', 'Email', 'Phone', 'Loyalty Status', and 'Total Purchas...'. The data rows are:

**Purpose of Datasets:**

- Testing validation rules (e.g., email format, quantity thresholds)
- Trigger execution based on order status
- Batch job test cases (e.g., products with stock < 10)
- Flow execution for email alerts and loyalty updates
- Report generation on sales, stock, and customer segments
